## CHAPTER 1: HIV/AIDS TREATMENT AND CARE

The Ryan White HIV/AIDS Treatment Modernization Act is intended to help communities and states make it easier for those infected by HIV to get health care and supportive services.

### **RYAN WHITE PART B PROGRAMS**

**Jodie Pond, MPH**  
Ryan White Part B Director, ADAP Director

(801) 538-6225  
Fax: (801) 538-9913

#### **AIDS Drug Assistance Program (ADAP)**

The ADAP program can help you pay for all or part of your HIV medications if you meet the program requirements.

#### **Health Insurance Continuation Program**

The Treatment and Care Program can pay your COBRA payments if you meet the program requirements.

#### **Premium Payment Program (HIP)**

The ADAP Private Insurance program can pay you co-pays for HIV medications if you have private health insurance, but can't afford to pay for them yourself. You must meet the program requirements.

For information on any of the above programs, please contact:

**Karin Parker**  
Client Services Coordinator  
Utah Department of Health  
288 North 1460 West  
Salt Lake City, UT 84114  
Mailing Address: PO Box 142105 SLC, UT 84114-2105

## CHAPTER 2: HIV PREVENTION

### **HIV Exposure Response**

For immediate assistance with evaluating a recent HIV exposure, call personal physician or:

**Infectious Diseases Clinic** (801) 585-2031  
University of Utah Health Sciences Center Fax: (801) 585-5481  
30 North 1900 East, Rm. 4B319  
Salt Lake City, UT 84132

For questions about possible exposure to HIV, call:

**Rebecca Fronberg** (801) 538-6299  
HIV Counseling and Testing Coordinator  
Utah Dept. of Health  
Box 142105  
Salt Lake City, Utah 84114

For assistance with rape or sexual assault, call personal physician or:

**Rape Recovery Center**  
24-hour Crisis Line (Salt Lake City, Utah) (801) 467-7273  
Utah 24-hour Crisis & Information Line

Agencies that provide medical care should have updated guidelines for their agency for responding to possible occupational HIV exposure.

For questions about OSHA guidelines:

See your agency guidelines  
Contact the designated safety coordinator for your agency  
Contact your agency's designated OSHA representative in Utah  
Or call: **Eldon Tryon** (801) 530-6834  
Occupational Safety and Health Administration (OSHA)

For physician consultation on how to give HIV positive test results, call:

**Rebecca Fronberg** (801) 538-6299  
HIV Counseling and Testing Coordinator  
Utah Dept. of Health  
Box 142105  
Salt Lake City, Utah 84114

**Sue Yanik (Wednesday Only)** (801) 534-4648

**Cathy Matthews** (801) 534-4616

**Debbie Dean** (801) 534-4667  
Salt Lake Valley Health Dept. Fax: (801) 534-4502  
610 South 200 East  
Salt Lake City, UT 84111

28 South 100 East  
Call for appointment.

## CHAPTER 2: HIV PREVENTION

### **Utah HIV Prevention Community Planning Committee (CPC)**

Utah has one statewide HIV prevention planning committee with 26 members. CDC recommends that members of HIV prevention planning groups reflect the characteristics of the epidemic in the state. This means that for Utah the planning committee should be composed of individuals who represent men who have sex with men (MSM), injecting drug users (IDU), women at risk, youth, and ethnic populations (particularly Hispanic and African American). This representation can come from individuals in those categories, or from organizations which serve the populations listed. CDC also recommends that individuals with experience in social and behavioral sciences and/or experience in program planning and evaluation be included for effective committee representation. Applications for membership are taken in late summer/early fall of each year.

**The Diffusion of Effective Behavioral Interventions project (DEBI)** is a national-level strategy to provide high quality training and on-going technical assistance on selected evidence-based HIV/STD/Viral Hepatitis prevention interventions to state and community HIV/STD program staff. This website provides support for all approved DEBI interventions.

[www.effectiveinterventions.org](http://www.effectiveinterventions.org)

## CHAPTER 3: HEPATITIS C

### **Hepatitis C Information**

Taken from [www.cdc.gov](http://www.cdc.gov), [www.hcvadvocate.org](http://www.hcvadvocate.org) and [www.hepc-connection.org](http://www.hepc-connection.org).  
Go to their websites for more information.

#### **What is Hepatitis C?**

- Hepatitis C is a liver disease caused by the hepatitis C Virus (HCV). The virus infects the liver and the blood. Many years after hepatitis C infects the liver and the blood, the liver can become so damaged that it cannot work properly to do the jobs that keep us healthy.
- According to the Centers for Disease Control and Prevention (CDC), at least 4.1 million Americans are infected with hepatitis C.
- Hepatitis C kills approximately 8,000 to 10,000 Americans each year.
- Hepatitis C is one of the main reasons for liver transplants in the U.S.

#### **How do I get Hepatitis C?**

- You get hepatitis C ONLY when the blood of another person infected with the hepatitis C Virus gets into your body.
- Sharing needles used to inject drugs or other things.
- Sharing drug injecting paraphernalia—needles, cookers (to mix drugs), cottons (to filter drugs), and tourniquets or ties.
- Blood transfusion or organ transplant before July 1992.
- Sex—it is rare, but having multiple partners and/or having unprotected sex increase the risk of getting HCV.
- Unsterile tattoos or body piercings. The person giving the tattoo or body piercing should:
  - Use sterilized equipment for each customer.
  - Always use new needles.
  - Wash hands and put on a new pair of latex gloves.
  - Use new, disposable razors for shaving skin.
  - Use new, sterilized jewelry for any body piercing.
- Sharing personal hygiene items that may have blood on them such as razors, shavers or toothbrushes.
- Any other direct exposure to HCV-infected blood.

#### **What are the symptoms of Hepatitis C?**

- Many people have no symptoms for a long time, or they may have mild symptoms at times. If they do have symptoms, they may include any of the following:
 

<ul style="list-style-type: none"> <li>○ Fatigue</li> <li>○ Feeling sick to the stomach</li> <li>○ Aches and pains in muscles, joints and abdomen</li> <li>○ Fever</li> <li>○ Night sweats</li> </ul>	<ul style="list-style-type: none"> <li>○ Loss of appetite</li> <li>○ Nausea and vomiting</li> <li>○ Yellowing of skin and/or eyes (jaundice)</li> <li>○ Weight loss</li> <li>○ Insomnia</li> </ul>
---	--

#### **Will I get sick?**

- It can take many years (up to 40 years) to get very sick with hepatitis C.
- About 75-80% of the people who have hepatitis C will develop chronic (long-term) infection.
- About 20% of the people who have chronic hepatitis C will get very sick with cirrhosis. It usually takes many years.
- Cirrhosis—severe scarring or hardening of the liver—may occur prior to experiencing symptoms. Cirrhosis leads to liver failure. Those who have liver failure need a liver transplant because a person cannot live with a failing liver.
- About 3 % of the people who have chronic hepatitis C will get liver cancer.

## CHAPTER 3: HEPATITIS C

### **Local Support Group Information**

#### **Hepatitis C Support Group**

1063 East 3300 South, Suite 102 (downstairs in boardroom)

First & Third Tuesdays of each month

Who Are They? Wasatch Homeless Health Care, Inc. works with local health departments with the surveillance, control, and treatment of tuberculosis (TB) in Utah. It is an open door clinic that serves homeless individuals and adolescents and services are provided at no cost to the patients.

#### **Primary Care Network**

Primary Care Network

PO Box 144102

Toll Free: 1-888-222-2542

Salt Lake City, Utah 84114-4102 [pcn@utah.gov](mailto:pcn@utah.gov)

## CHAPTER 3: HEPATITIS C

What Is Primary Care Network (PCN)? The Primary Care Network (PCN) is health care coverage for single adults ages 19– 64 who qualify. Primary care services available through PCN include primary care provider visits, some emergency room visits, emergency medical transportation, lab services, x-rays, up to four prescriptions per month, dental exams, dental x-rays, cleanings, and fillings, one eye exam per year, and family planning methods.

How Do I Apply? Those who qualify will gain access to preventive health insurance coverage. If you are uninsured and have children at home under age 19, you may qualify for health insurance.

Apply online. Go to <https://chip.exevision.com/pcn/Start.jsp>

Mail. To print an application, go to [http://health.utah.gov/pcn/PDF/PCNApp12\\_2004.pdf](http://health.utah.gov/pcn/PDF/PCNApp12_2004.pdf)

Visit an eligibility office. To find an office near you, please call 1-888-222-2542.

### Providers Offering HCV Services That Accept PCN

**John Lowe, MD**

**Utah Digestive Health Institute**

(801) 479-9400

6028 South Ridgeline Drive

South Ogden, UT 84405

**Nate McBride, PA-C**

**Utah Digestive Health Institute**

(801) 475-5400

## CHAPTER 3: HEPATITIS C

### **Patient Assistance Programs (Medication Assistance)**

If it is determined that you need medical care, ask your medical provider if you qualify for patient assistance programs. The following provides patient assistance programs:

#### **Roche Patient Assistance Program**

What is the Roche Patient Assistance Program? The Roche Patient Assistance Foundation provides free Roche products to patients who cannot afford prescription drugs and qualify for the program. It does not charge a co-payment or limit the time while the patient is receiving free drugs. To find out more about the program, call 1-877-75ROCHE (877-757-6243).

#### **Schering-Plough Patient Assistance Program**

What is the Schering-Plough Patient Assistance Program? Schering-Plough provides Schering-Plough hepatitis C drugs for people with low incomes and secures drug reimbursement through their patient assistance program. The program for people who need hepatitis C drugs is called "Commitment to Care". To find out more about it, call 1-800-521-7157.

### **Clinical Trials**

Some of those who have hepatitis C may qualify to become a participant of a clinical trial. To find out more about clinical trials, contact the following research coordinator(s):

**Mountain West Gastroenterology** - Mountain West Gastroenterology conducts HCV clinical trials at various times throughout the year. For information on current or upcoming clinical trials, contact the research coordinator, Tiffany, at (801) 944-3176.

### **Community Health Centers**

Who Are They? Community-Based Health Centers (CHCs) provide access to case-managed, family-oriented preventive and primary health care services for people living in medically underserved community.

What Do They Do? CHCs provide high quality care through a proven cost-effective model and all the services are provided based on an ability to pay.

#### **Bear Lake Community Health Center, Inc.**

- Accepts Medicaid
- Hepatitis C Testing Available
- Hepatitis A & B vaccinations
- Hepatitis C Treatment
- Alternative Health Care: Psychiatry
- \*Must be referred by a local mental health center for admission.

## CHAPTER 3: HEPATITIS C

### **Immunization Information**

If you have hepatitis C, it is highly recommended that you get vaccines against hepatitis A (HAV) and B (HBV).

When people with hepatitis C are co-infected with hepatitis A and B, the outcome of the infection can be very severe. A combination HAV/HBV vaccine is also available for people who are interested. Contact your local health department to inquire about hepatitis A and B vaccination availability. See page 3-5 to find your local health department.

### **How To Love Your Liver**

The liver is a very important organ. One of its jobs is to filter virtually everything that you take into your body. However, drinking alcohol, smoking cigarettes and inhaling toxic fumes can damage the liver and affect its performance.

There are things you can do to love your liver.

- Stop (or greatly reduce) drinking alcohol, smoking cigarettes and taking drugs.
- Stay away from supplements that contain a lot of iron. If you are taking supplements, switch to a formula that has no/low iron.
- Avoid a lot of processed sugars.
- Eat more vegetables and fruits, particularly those high in vitamin C.
- Stay away from toxic fumes and/or liquids.
- Tell your family and friends that you need them to help you stop (or greatly reduce) drinking, smoking and taking drugs.
- Get vaccines to protect your liver.
- Tell your doctor about all medicines you are taking, including over the counter medication.
- Eat a healthy and well-balanced diet.
- Drink a lot of water.
- Stay away from raw or uncooked shellfish.
- Limit your caffeine intake by cutting back on coffee, tea and soda.
- Avoid taking high doses of vitamin A and D.
