STD data source: Utah Department of Health, Bureau of Communicable Disease Control, STD Control Program.

Population data source: Utah Department of Health, Center for Health Data.

Note: Relatively small numbers of cases may lead to volatile rates. A small change in the number of cases can noticeably change the rate. This change may look significant, but, statistically, it may not be. Caution is strongly recommended when interpreting small case numbers and rates.

*Causative agent *Neisseria gonorrhoeae*; laboratory confirmed.

**Rates are calculated by dividing the number of reported cases in the health district by that year's population, then multiplying by 100,000.

***Provisional data as of 7-10-08.

For additional data requests, contact the STD Control Program (801)538-6171.
