## Introduction

---

The Planned Parenthood Association of Utah, together with the Utah Department of Health, Tuberculosis Control/Refugee Health Program, has developed this Refugee Providers Guide to better serve Utah's refugee population. The guide is designed to be a resource for providers. It provides providers with a list of specialists and other health care professionals who are able to work well with refugees.

In order to compile the information in this guide, Planned Parenthood conducted a survey of providers throughout the state. Those providers who indicated an interest in working with refugees have been included in this guide.

Providers are listed in alphabetical order, by specialty and by location. If you would like to be listed in future guides please contact:
