

**Testing Option A**

1. Zika virus RNA detection serum and urine (PCR)
2. Zika virus IgM (serology) followed by PRNT if positive
3. Dengue virus RNA detection serum (PCR)
4. Chikungunya virus RNA detection serum (PCR)

**Testing Option B**

1. Zika virus IgM (serology) followed by PRNT if positive

\*If exposure occurred over 12 weeks, IgM and PCR are negative, and infant has congenital abnormalities, specimens could be sent to CDC for PRNT. In this case, please contact UDOH at 801-538-6161.
