* The Utah County Health District includes all residents of Utah County.

*** Insufficient sample size for calculation of population estimates.

Note: Obesity was defined as a BMI of 30 or more. BMI is calculated by dividing weight in kilograms by the square of height in meters. For example, a male or female who is 5'8" is considered obese if he or she weighs 197.5 or more pounds. Respondents tend to overestimate their height and underestimate their weight leading to underestimation of BMI and the prevalence of obesity.
