YRBS Consent

Ask respondents with child age 13-17 in the household on all 3 Questionnaires, July - December.

Now I would like to ask you 6 short questions about the Youth Risk Behavior Survey. The Youth Risk Behavior Survey is an anonymous, school-based paper survey that monitors priority health-risk behaviors among 9th through 12th grade students; data are used by the Utah Department of Health and the Centers for Disease Control and Prevention.

In Utah, youth sexual behavior is not monitored. Previously you indicated that you are the parent, foster parent or guardian of a child between the ages of 13 and 17. For the next 6 questions please indicate how likely or unlikely you would be to consent for your child, age 13 to 17, to be asked that particular sexual behavior question in the Youth Risk Behavior Survey. Consent meaning that you would agree to let your child be asked that question about their behavior. For each, tell me “Definitely consent,” “Probably consent,” “Probably not consent,” or “Definitely not consent.”
