

## UTAH WATER FLUORIDATION LEVELS

A half-dose daily fluoride supplement is indicated for residents of communities that have naturally occurring fluoride present in the water supply between 0.3 to 0.6 ppm (mg/L). No daily fluoride supplement is indicated for residents of communities which have optimum levels of adjusted or naturally occurring fluoride above 0.6 ppm (mg/L). A full daily fluoride dose supplement is indicated for all other Utah communities.

**Community water systems not listed below have fluoride levels less than 0.3 ppm and therefore, require full fluoride supplementation.**
