Figure 3 shows the 10-year trend for reporting Utah student injuries. It helps identify whether the state as a whole is consistently reporting student injuries year to year or not.

Figure 4 shows the percentage of injury for the areas of the body for grades K-6 and 7-12.

Table 4 shows the nature of the most common student injuries in grades K-6 and 7-12.

Table 5 shows the most common contributing factors to student injuries in grades K-6 and 7-12.

Table 6 shows the most common school periods when student injuries occur in grades K-6 and 7-12.
